

Criteria Form

Record ID

Date of event onset {illness_tcd} Date of Thrombocytopenia {thrombocytopenia_tcd} Hospital admission? {illness_hospital} {hospital_tcd} Admitting diagnosis: {illness_admittingdiag} Discharge diagnosis: {illness_dischargeddiag}

Date of event onset

(DD-MM-YYYY)

Date of Thrombocytopenia

(DD-MM-YYYY)

Hospital admission

- ☐ Yes
☐ No
☐ Unknown

Hospital admission date

(DD-MM-YYYY)

Admitting diagnosis:

Admitting diagnosis:

The Case Definition (CD) Level of Certainty (LOC) is determined based on a series of clinical conditions defined below.

Criterion A: Confirmation of DVT

A1. Pathologic findings from autopsy. Check the one best answer and provide details as appropriate:

- ☐ Autopsy showed presence of DVT
☐ Autopsy done but showed no evidence of DVT
☐ No autopsy done, unknown if done, or done but results unavailable

Date of autopsy

(MM-DD-YYYY)

Brief description in terms of the pathologic proof of DVT or both if present:

A2. Surgical procedure. Check the one best answer and provide added details as appropriate:

- ☐ Thrombectomy related to DVT performed
☐ Other procedure done that confirmed presence of DVT
☐ No surgical procedure done; or, done but either did not confirm presence of DVT or findings unknown; or unknown if done

Please, describe procedure, location and finding:

A3. Imaging studies confirmed the presence of DVT

A3.1. Choose the one best answer

- ☐ ≥ 1 imaging study was done and confirmed DVT
☐ ≥ 1 Imaging study was done but didn't confirm DVT
☐ No imaging studies done, unknown if done, or done but results unknown

A3.2. Which studies confirmed DVT? Check all that apply:

- ☐ Compression ultrasonography
☐ CT or MR venography
☐ Contrast venography
☐ Doppler/Duplex Ultrasound
☐ Other {a3_2_other}

Specify other

A3.3. Describe location(s) of DVT based on imaging study:

Criterion B: Clinical evidence for presence of DVT

B1.1. Signs and symptoms of DVT reported. Choose the one best answer:

- ☐ ≥ 1 symptom or sign of DVT was reported
☐ There was no report of a recognized DVT syndrome
☐ It is unknown if there was a report of a DVT syndrome

B1.2. Specific type(s) of DVT. Check all that apply:

- ☐ Lower extremity DVT
☐ Upper extremity DVT

B2. New onset clinical symptoms or signs that could suggest DVT. Check all that apply:

- ☐ Calf pain or tenderness
☐ Leg swelling or pitting oedema
☐ Absent pulses in legs or arms
☐ Redness, warmth, or pain in one or more extremities
☐ None of the above were present or it is unknown if any of 1-4 were present

Criterion C: D-Dimer

C. D-Dimer. Choose the one best answer:

- ☐ D-dimer exceeded test lab's upper limit of normal.
☐ D-dimer tested and was within test lab's range of normal
☐ D-dimer not tested, or tested but results unknown or not available

What was the highest measured value within 2 weeks before and 2 weeks after the date of the event under validation?

If known, please indicate the test lab's upper limit of normal:

Criterion F

F. Reported as a case of DVT by specialist, without details

- ☐ Yes
☐ No

Criterion X: Alternative diagnosis

X. Alternative diagnosis. Choose the one best answer:

- ☐ An alternative diagnosis was found that explained the acute illness {x_description}
☐ No alternative diagnosis was found to explain the acute illness

Description
